about

Data scientist and big data engineer in London. Python, Java & Scala developer. Spark and graph database enthusiast. Applied mathematician by training. Scholar of gastrointestinal motility variation. UK Tier 1 Exceptional Talent Visa.

technical summary

- 🔧 **Massively scaled graph database analytics.** , production
Leveraging Cassandra and Spark (Spark Streaming) for large-scale graph networks and analyses including:
Building tools to explore and analyze graph data in a distributed cloud-based cluster. Developing machine learning algorithms and automation of real-time entity resolution / disambiguation at scale. Dealing with 10^7 (eventually reaching 10^9) transactions daily utilizing Kafka and Spark Streaming to ingest massive amounts of data through an ETL pipeline. successfully deploying working beta software to client; revenue increase from \$1.8M to \$6.0M; internal investment by firm (\$0.5M) to generalize new capability based on client deliverable.
- 🔧 **Stochastic fluid transit model** , research
Developed in Java to study the effects of physiological variations on drug transit, dissolution, and absorption
Pulsatile, non-deterministic approach; Application of a non-homogeneous Poisson process; Based on sampling from and imaging of small bowel free water content
- 🔍 **Study of large data sets** , research
Goal to identify patterns in drug product submissions and failures in the Office of Generic Drugs
- 📊 **Analysis of noisy gastrointestinal pressure signals** , research
Wavelet-based peak detection and kernel density estimation; Machine learning, Gaussian process regression & PCA for signal classification; Completed in Python with SciPy/NumPy/SciKit packages

professional experience

- aug 17 - pres **Scape Technologies** , principal data scientist
Building core data flow and analysis pipeline for vision-based location recognition, allowing devices to see and remember their surroundings & augment the world around them. Cloud-side infrastructure allows mobile devices to enhance the world around them by overlaying digital items onto the physical world, both indoors and outdoors, using machine vision & artificial intelligence.
- aug 16 - jul 17 **Deloitte Consulting LLP** , senior data science consultant
Mission Analytics in Business Model & Transformation/Strategy & Operations. Supporting senior government executives in the development of the organization's strategy and business process; assisting in development, collection, analysis, and reporting of data by leverage big data and machine learning technologies; serving as domain knowledgeable resource in advising the Deloitte team and client on tools and techniques to improve workflow.
- jul 15 - aug 16 **U.S. Food and Drug Administration** , research fellow
Division of Quantitative Methods and Modeling in the Office of Research and Standards within the Office of Generic Drugs. Applying mathematical analysis to physiological/molecular based models for drug absorption, bioavailability, distribution and effectiveness. Using large data sets to improve the prediction and regulatory decision making for generic drugs.
- mar 06 - aug 07 **Department of Lunar & Planetary Sciences
University of Arizona** , java developer
Developing open-source software for data analysis for the HiRISE instrument on the Mars Reconnaissance Orbiter. Co-funded by NASA and JPL.

education

- 2015 **Ph.D.** Pharmaceutical Sciences, University of Michigan
Dissertation: *Mechanistic Analysis and Quantification of Gastrointestinal Motility: Physiological Variability and Plasma Level Implications.*
- 2011 **M.Sc.** Pharmaceutical Sciences, University of Michigan
- 2009 **M.Sc.** Computational Biology, New York University
- 2006 **B.Sc.** Mathematics, University of Arizona
